- Longstanding experience with large, complex and demanding projects
- Guaranteed quality according to ISO 9001
- Development of customised IT tools

Contact us. We will gladly advise you.

Beratung, Planung und Management für Ihr Projekt

Who we are

60 years and counting

Emch+Berger AG Bern is a company of the Emch+Berger Group, founded in 1953. As the largest company in the Emch+Berger Group, we can offer complete services for infrastructure construction, environment, mobility and energy and guarantee maximum benefit for large projects. At the same time, we ensure undivided responsibility for small projects through customer proximity.

Holistic solutions together

Our aim is to develop innovative, sustainable and technically and economically optimised holistic solutions for you from a single source. Core is our ability to listen to you and to develop solutions with you.

Our company is fully owned by our employees. This doesn't only make us independent, but also motivates us to deliver, every day.

Close to you

With several locations in our home region and in Copenhagen we are present locally for our customer. We know your needs and use the expertise of our specialists to your advantage through our networked IT structure.

Sustainability

We take our social responsibility seriously and plan sustainable solutions. Our commitment is certified and measures up to the best.

A dedicated team

You can count on the enthusiasm, commitment and sense of responsibility of our employees and benefit from up-to-date know-how and a network of contacts in Switzerland and worldwide
